IC-75-0938

14 July 1975

MEMORANDUM FOR: Chairman, Information Handling Committee

SUBJECT : Interprogram IDHS Compatability

25X1 1. [] As you know, the DoD, Service and agency FY77 program
25X1 requests ask for some [] for IDHS. DIA, as systems
architect for IDHS, looks at DoD as a whole for both internetting and
node compatability.

25X1 2. [] We understand that the CIA program proposal has several
IDHS initiatives for FY77 and the out years. For program/budget
development, we need to know whether CIA and DoD IDHS programs
are compatible and, if not, the adjustments that will be necessary to
bring them into synch. This is particularly important, of course, if
CIA is to have access into the Defense distributed intelligence data bases
that will be developed and implemented over the next several years.

25X1 3. [] Although State has no large scale IDHS program, it also will
require access to the forthcoming distributed data base system. We need
to know the program implications of providing State this capability.

25X1 4. [] Please let us know by 1 September whether you find serious
IDHS incompatibility across Community programs, and, if so, what needs
to be done in FY77, and the out years through FY81, to get on track.
To the extent feasible, we would appreciate your recommendation for the
allocation of resources to specific IDHS projects.

25X1 []
